

# FACTSET DESKTOP SOLUTIONS WITH OPENFIN

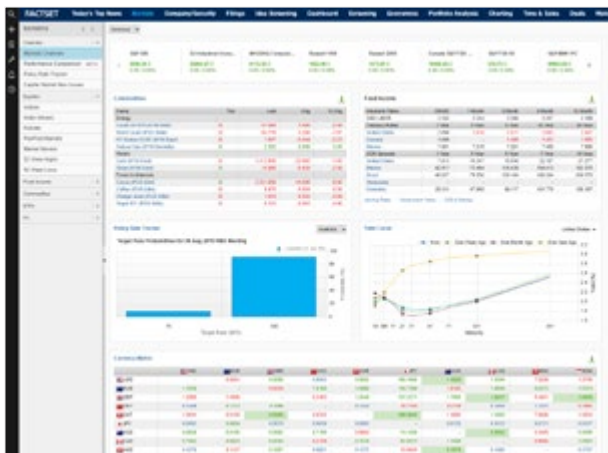

Use FactSet while leveraging OpenFin to interoperate with your homegrown and third-party applications.

## LEVERAGE FACTSET'S INTEROPERABILITY

FactSet's open, flexible solutions have always driven efficiency and productivity across the investment lifecycle.

Now, with OpenFin as a desktop scaffold, FactSet delivers even more turn-key services and workflow solutions via its web product, for a seamless user experience spanning idea generation, research, portfolio construction, trade execution, performance measurement, risk management, reporting, and portfolio analysis. As an active member of FINOS ([www.finos.org](http://www.finos.org)), FactSet is driving open collaboration and interoperability standards to further allow a true desktop multi-vendor ecosystem.

Benefit from a full desktop experience including features like workspace saving, identifier and context channeling, tabs and docking to layout FactSet in the way that works best for you while leveraging SSO (Single Sign-On) to seamlessly transition between applications.

## A UNIFIED SYMBOLOGY ACROSS ALL APPLICATIONS

Connect disparate applications via OpenFin, while taking advantage of FactSet's customizable reports, tools and widgets, as well as data feeds and APIs to build on top of an extensive unified data and analytics platform.

Search across data repositories and find secure and private answers, turning the FactSet desktop platform into an open and modular hub for your workflows.

With FactSet Web and OpenFin, you can go from idea to execution faster, creating full desktop ecosystems with a full range of technology and professional services.
